IT Essentials

El estudiante ha obtenido la credencial de nivel de estudiante por completar con éxito el curso IT Essentials administrado por el instructor que suscribe a continuación. El estudiante pudo hacer lo siguiente de manera competente:

- Seleccionar e instalar los componentes de la computadora adecuados para armar, reparar o actualizar las computadoras personales.
- Demostrar cómo son los procedimientos seguros de laboratorio.
- Usar adecuadamente herramientas para realizar mantenimiento preventivo y resolver problemas en computadoras personales.
- Realizar la instalación, la reparación, el mantenimiento y la solución de problemas de los sistemas operativos Windows.
- Explicar el funcionamiento de las redes de área local y configurar dispositivos para que se conecten a redes LAN y a Internet.
- Configurar los dispositivos para conectarse a Internet y los servicios en la nube.
- Explicar cómo configurar, reparar, actualizar, mantener y solucionar problemas de computadoras portátiles y dispositivos móviles.
- Explicar cómo configurar, asegurar y resolver problemas con los sistemas operativos móviles, OS X y Linux.
- Instalar y compartir una impresora para cumplir con los requisitos.
- Implementar la seguridad básica de usuario, datos y red.
- Explicar las funciones y las responsabilidades del profesional de TI.

Statement of Achievement

PCAP: Programming Essentials in Python

The graduate of the *PCAP: Programming Essentials in Python* course, administered by the undersigned instructor, and provided by **Cisco Networking Academy®** in collaboration with **OpenEDG Python Institute**:

- knows the universal concepts of computer programming, including variables, data structures, algorithms, control flow, functions, and exceptions;
- can proficiently use the developer tools, the runtime environment, and the syntax and semantics of the Python language;
- can use fundamental programming techniques, best practices, customs, and vocabulary, including the most common standard library functions in Python 3;
- can write Python programs using standard language infrastructure, and knows the means by which to resolve typical implementation problems;
- knows how to work with modules and packages, process text and binary files, and use generators, iterators, and closures;
- understands the fundamentals of object-oriented programming (OOP) and the way they are adopted in Python.
